Use Case #1

LTC Staff	PC Physician	Acute Care Nursing	Acute Care Physicians

A diabetic patient in a LTC facility has become increasingly weak and lethargic and has a low-grade fever. Patient refuses to get out of bed and is complaining of chills and the nurse has noted reddened area on coccyx upon braden scale assessment. Patients glucose level is elevated and the maximum sliding-scale dose indicated in medication order is not controlling the patient's blood sugar.
