	IHE Patent Process and Identification Of Patent Claims	All

IHE policies include the obligation to disclose known patent claims that would necessarily be infringed by implementers of IHE profiles, published or under development. That policy is defined in Appendix A, section A.3 of the IHE International Principles of Governance, which is available at http://www.ihe.net/governance/index.cfm. The process for making such disclosures is described at http://www.ihe.net/governance/patent_disclosure.cfm. That page also includes links to the letter of assurance form that is used to make disclosures, a page displaying a table of information (presently empty) that will be published from these disclosures and a set of announcement slides that summarizes the patent policy and disclosure process.
