

IHE DEV - DPI
@ Boston
2019-10-16 to 17

The IHE logo consists of the letters 'IHE' in a bold, dark blue, sans-serif font. To the right of the letters is a thin vertical line, followed by the tagline 'Integrating the Healthcare Enterprise' in a smaller, lighter blue font.

Enterprise

IHE DEV SDPi

White Paper + Profiles Roadmap

SDPi – Service-oriented Device Point-of-care Interoperability

- ✓ **Overview / Background**
- ✓ **SDPi White Paper – Update & Approval for Publication**
- ✓ **Roadmap Review & 2019 / 2020 Planning**
- ✓ **DEV Technical Framework:**
 - **TF-1 Profiles (vol. organization)**
 - **TF-2 Transactions (#'s, labels, ...)**
 - **Grouped Actors: V2, PCD profiles, FHIR**

SDPi – Service-oriented Device Point-of-care Interoperability

- ✓ **Overview / Background**
- ✓ SDPi White Paper – Update & Approval for Publication
- ✓ Roadmap Review & 2019 / 2020 Planning
- ✓ DEV Technical Framework:
 - TF-1 Profiles (vol. organization)
 - TF-2 Transactions (#'s, labels, ...)
 - Grouped Actors: V2, PCD profiles, FHIR

MDI: *The Standards Story*

- Today, devices use 100's of proprietary or “semi-standard” protocols.
- Using *common semantic base* is #1 objective.

| Program | IHE PCD | IEEE PHD / Continua | IEEE SDC / IHE SDPi | HL7 Devices on FHIR | OpenICE / MDPnP |
|-------------------------------------|---|--|--|--|---|
| Primary Use Context | Healthcare Enterprise | Home / Mobile | High Acuity (OR/ICU/ED) | Enterprise / Mobile / Home | High Acuity (OR/ICU) |
| Technical Base | HL7 V2.6 ¹ | IEEE 11073 | WS* | REST / HTTP | OMG DDS |
| Maturity / Production Systems | Dozens of commer- cially available products | 100's of Certified PnP Products | Prototyped; First devices placed into patient use | PoCD & PHD IGs; FHIR Connectathons; Continua FHIR Guidelines | Prototyped; See MDPNP.org for latest |
| Semantics | <u>IEEE 11073 Terminology & Model ²</u> | | | | |

¹ + 2.7, 2.8.x ² Core 11073 terms mapped to LOINC

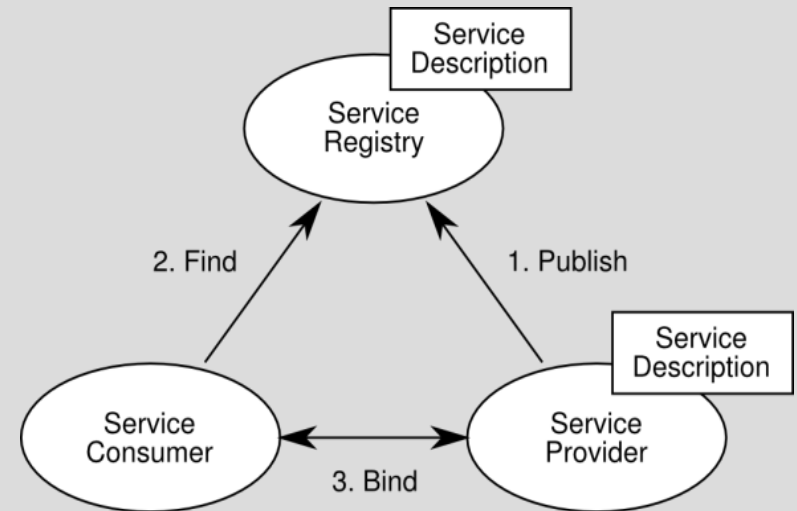

- ✓ Standards
- ✓ Open Sources
- ✓ Testing Tools

See IHE SDPi White Paper Appendix B for references.

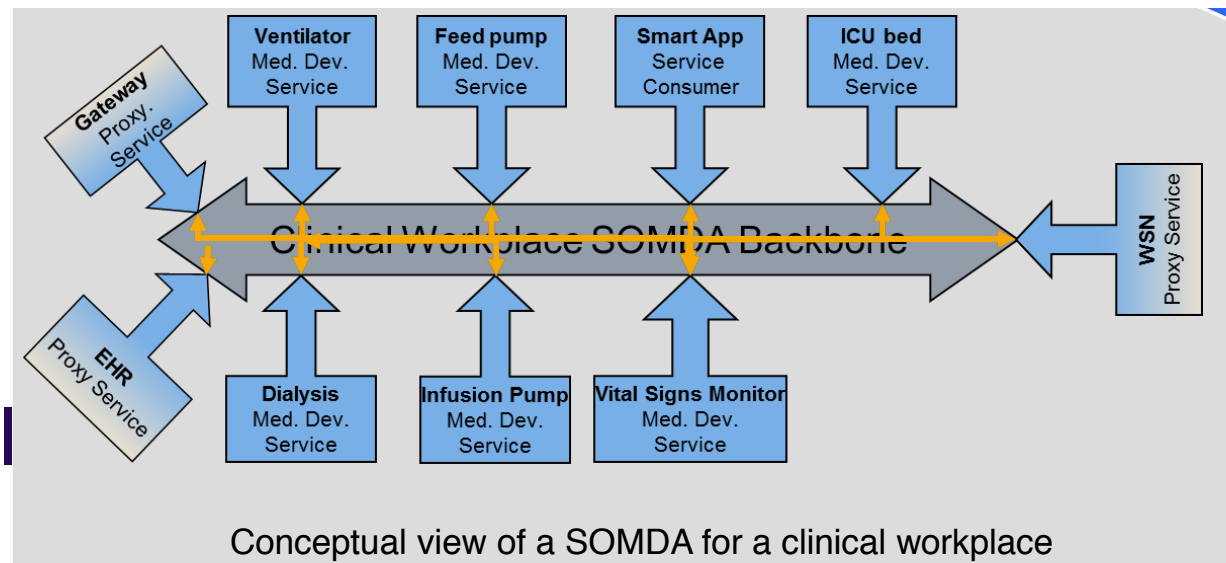

SDC Standards & Functional Capabilities

The concept of a
**clinical workplace service-oriented
medical device architecture**
transfers the concept of a
service-oriented architecture
to the domain of
**distributed system of medical devices
for one clinical workplace.**

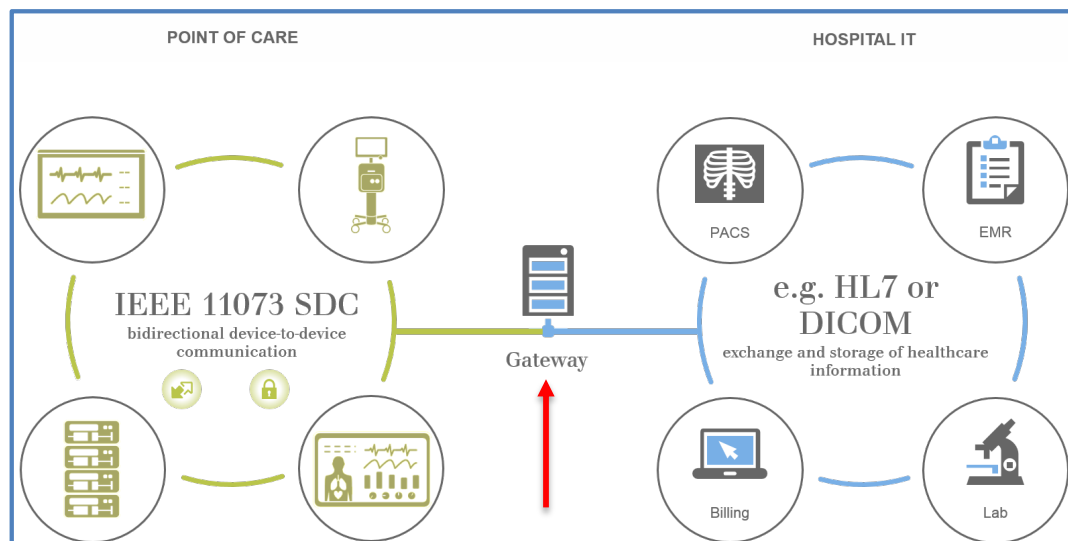

(Sources: SDC overview presentations)

**Device-to-Device
Plug-and-Play
Reporting /
Alerting & Control**

MDI: *It's All Connected!*

Proposed IHE PCD Restructuring

IHE PCD => IHE Devices

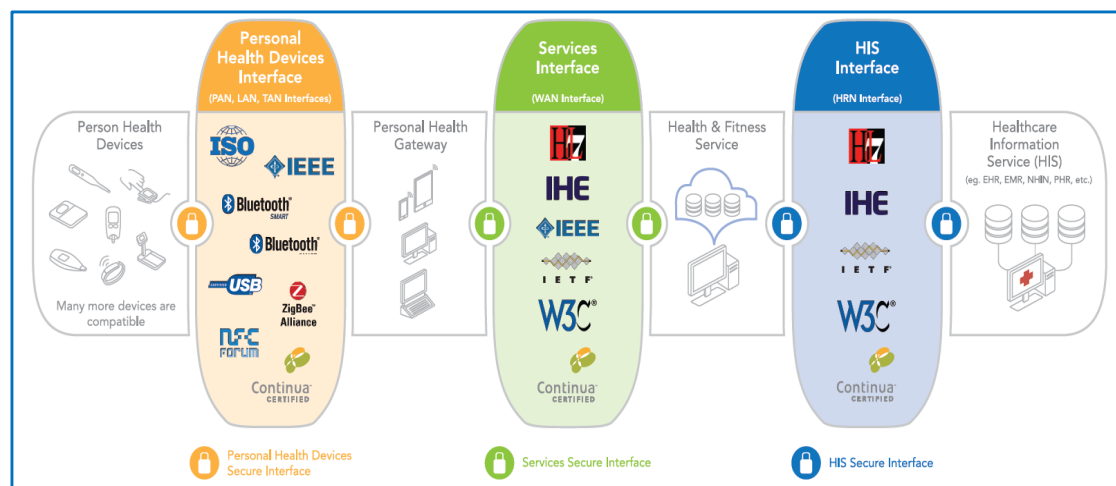

Subdomains for ...

- ✓ **Device Point-of-care Interoperability (DPI)**
- ✓ **“PCD” Device-Enterprise Integration**
- ✓ **Personal Connected Health (PCH)**

SDC Point-of-Care Context

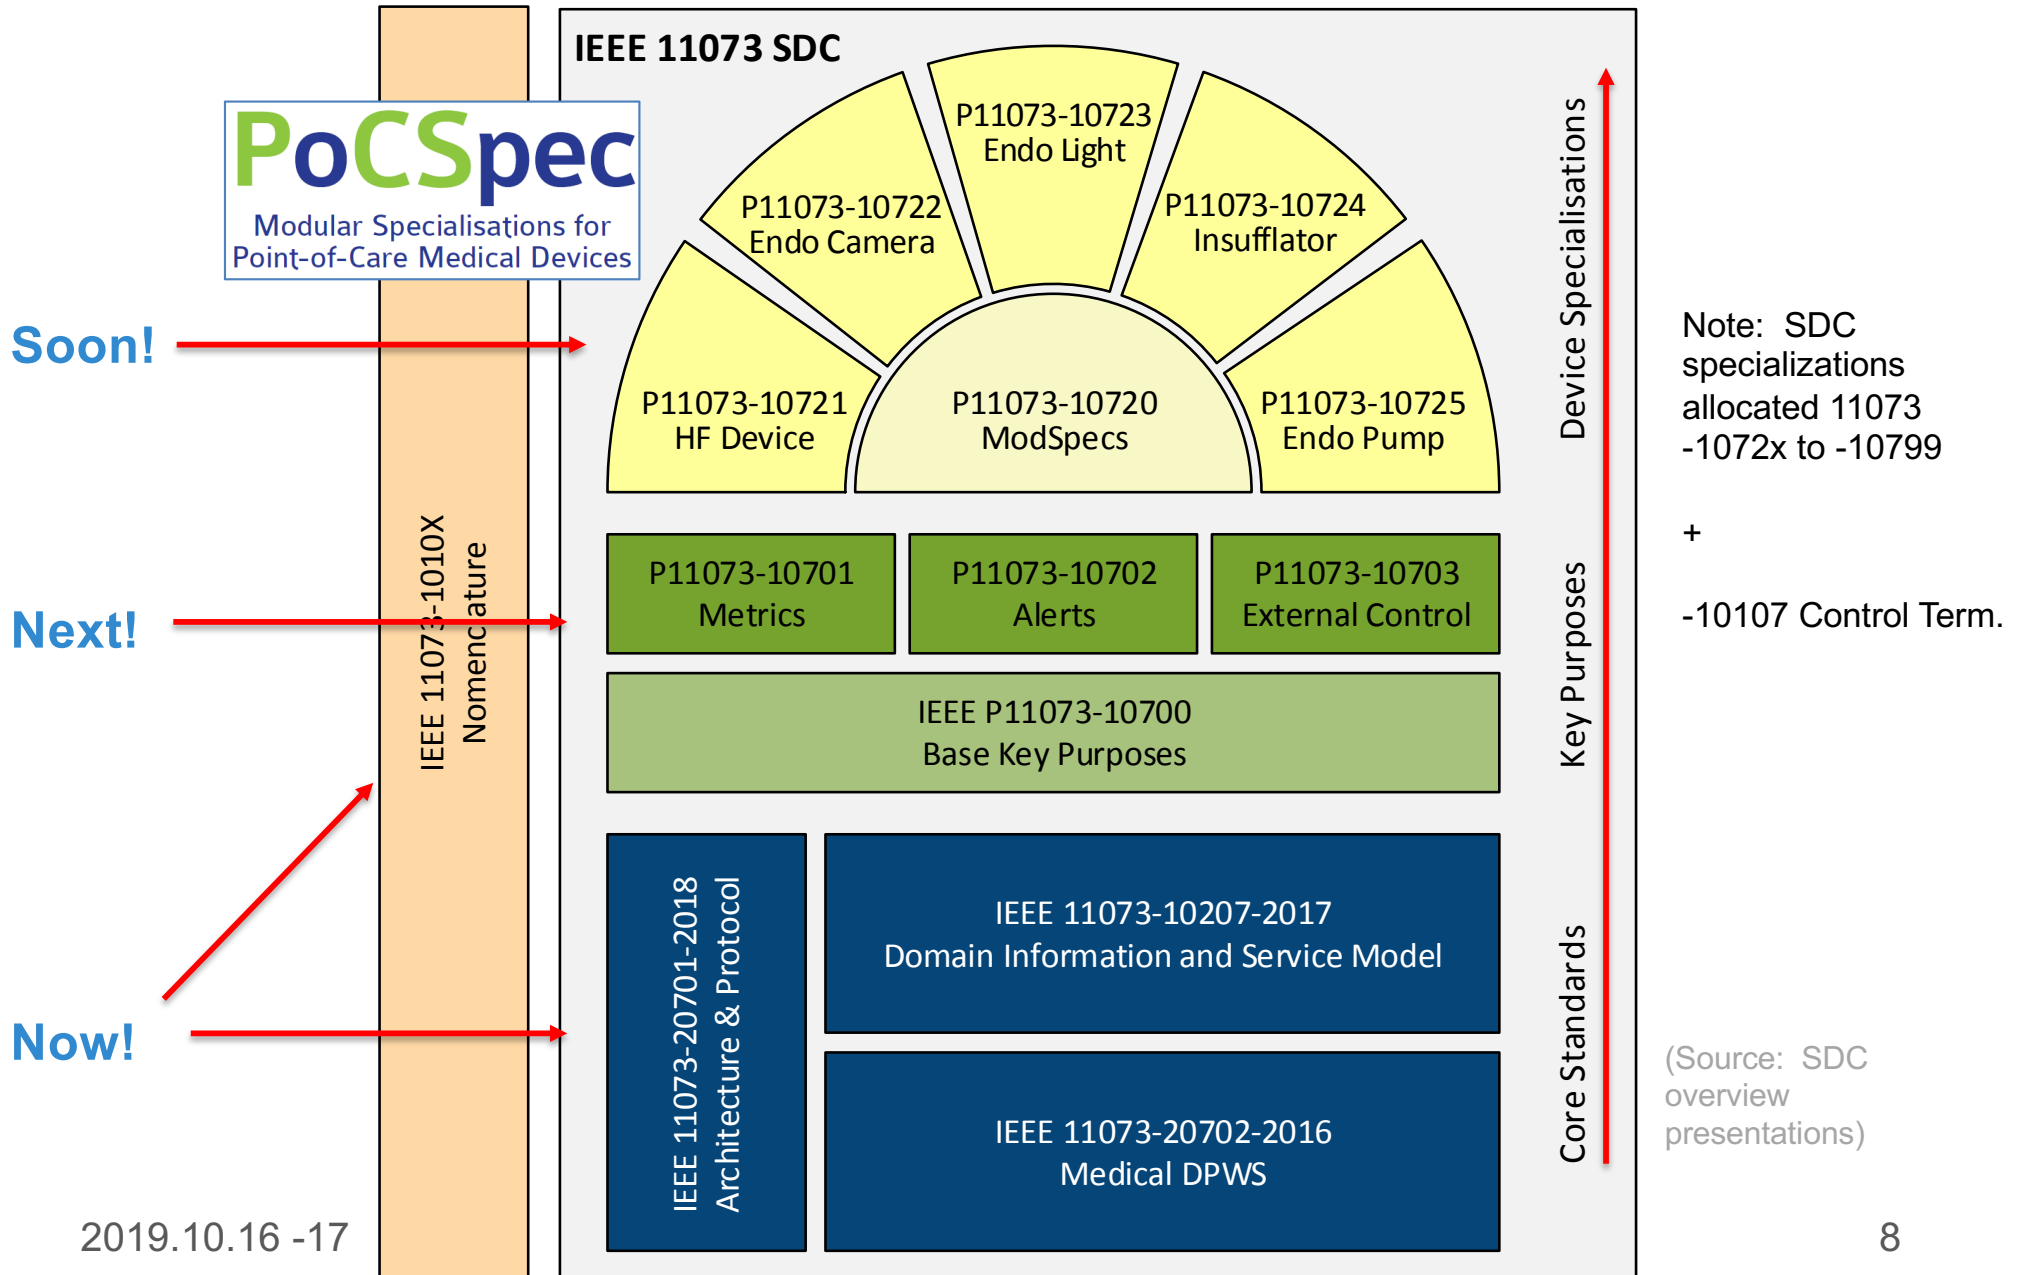

IHE “Enterprise” Context

3 Device Use Contexts ... One consolidated IHE Technical Framework

Download @ www.pchalliance.org/continua-design-guidelines

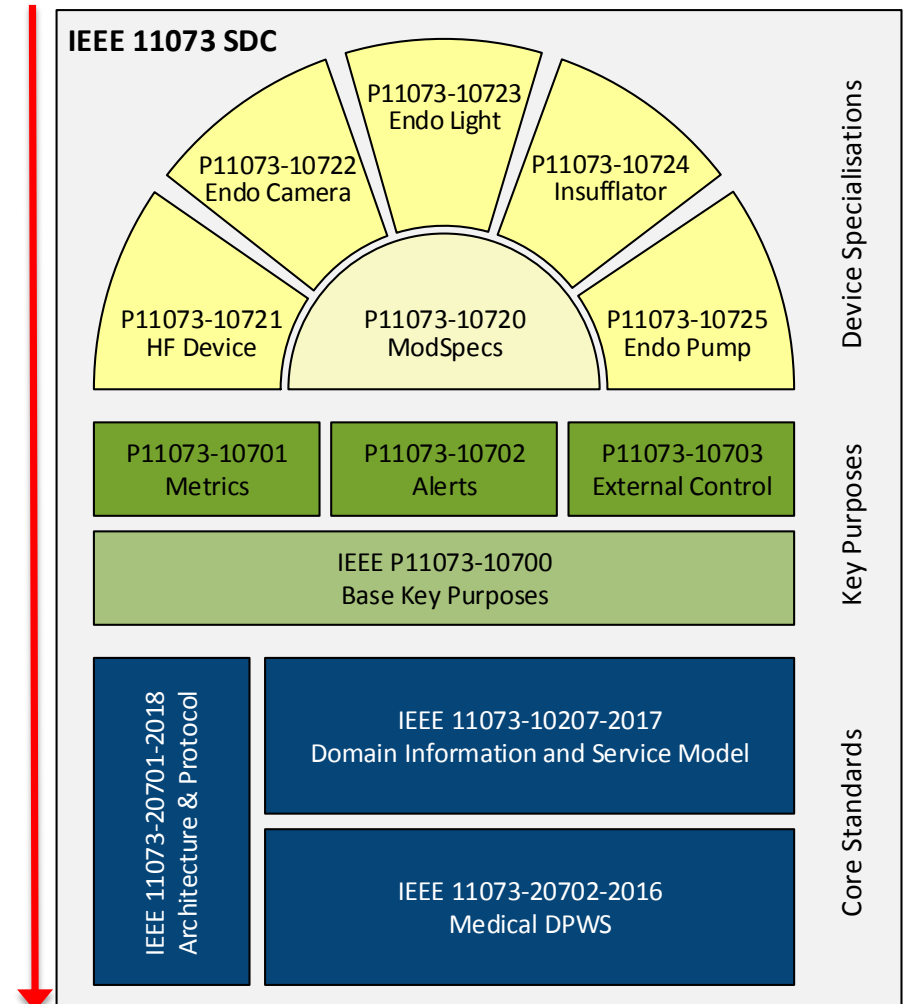

DEV::DPI::SDPi Layers

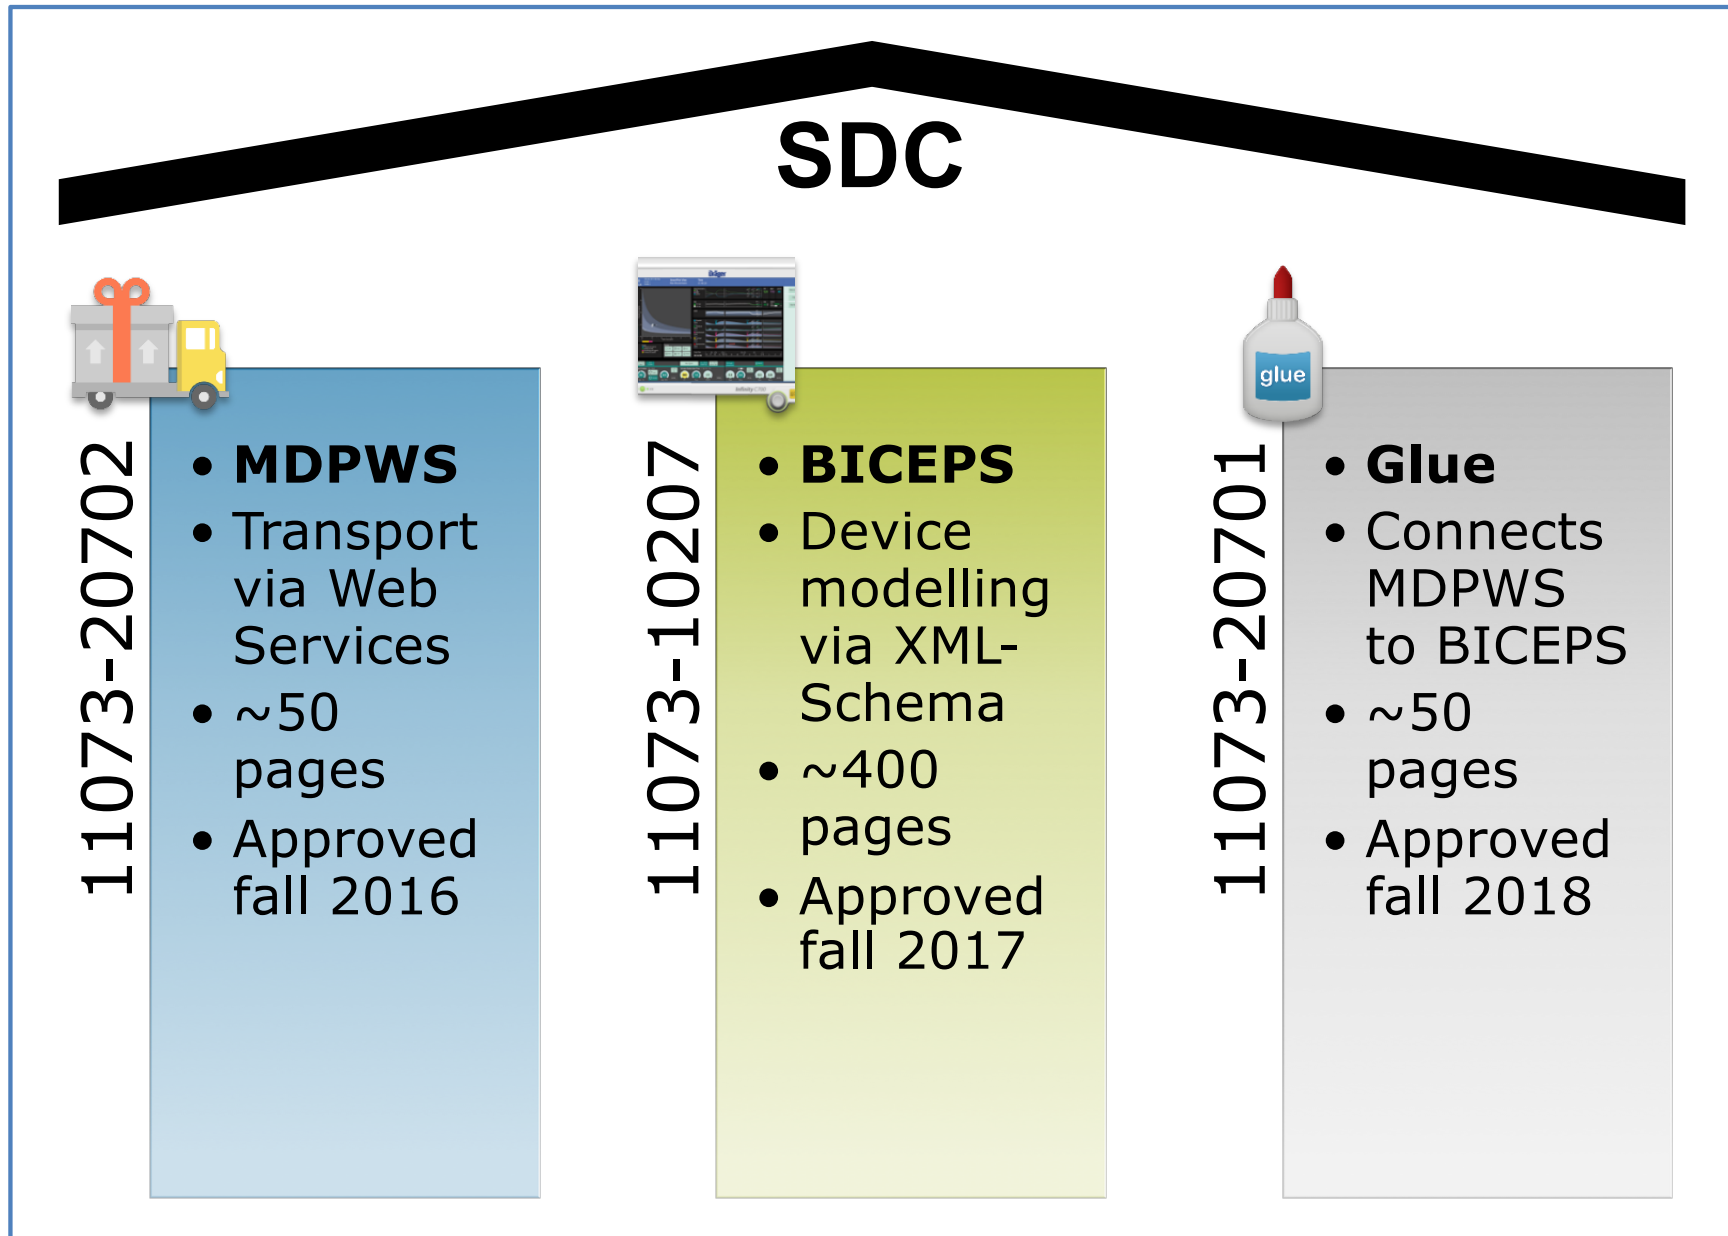

BICEPS / Dev Specializations

SDC SES Design Approach

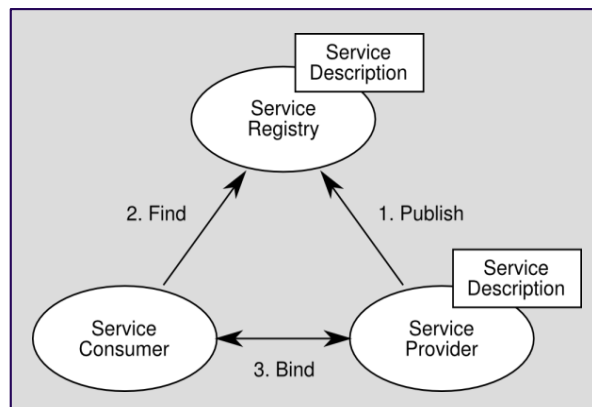

1. Establish **Key Purposes** of Interoperability from MDS to interface:
 - Connectivity
 - Reporting
 - Alerting
 - External Control
2. Integrate “testable assertions” into each standard (“Rxxxx”)
3. Bind Rxxxx from layer to layer
4. Address both Functional & Non-functional (RM) Aspects
5. **Per-device System Function Contribution defined**

MDPWS/WS-*

SDC Standards & Functional Capabilities

Basic Discovery & Exchange

(note: distributed
“registry” architecture)

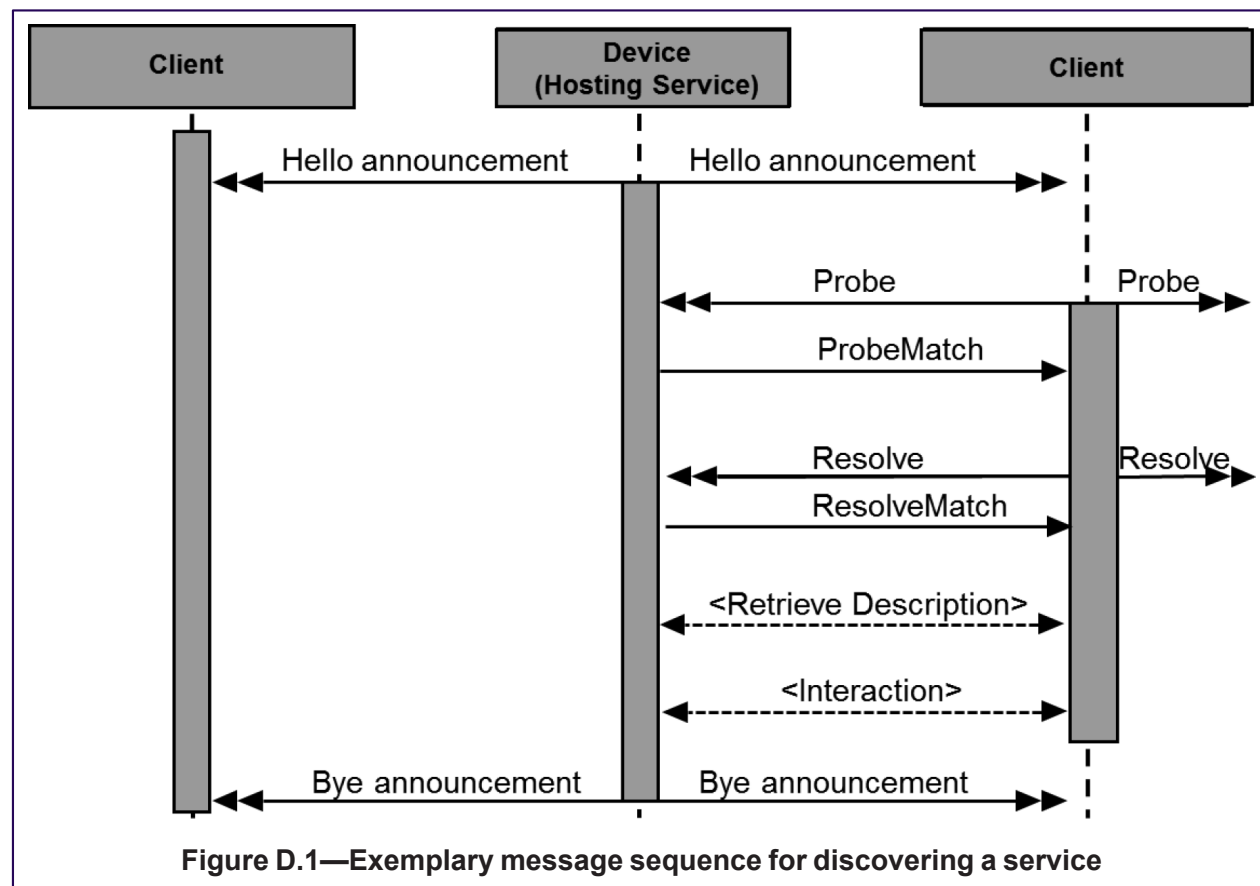

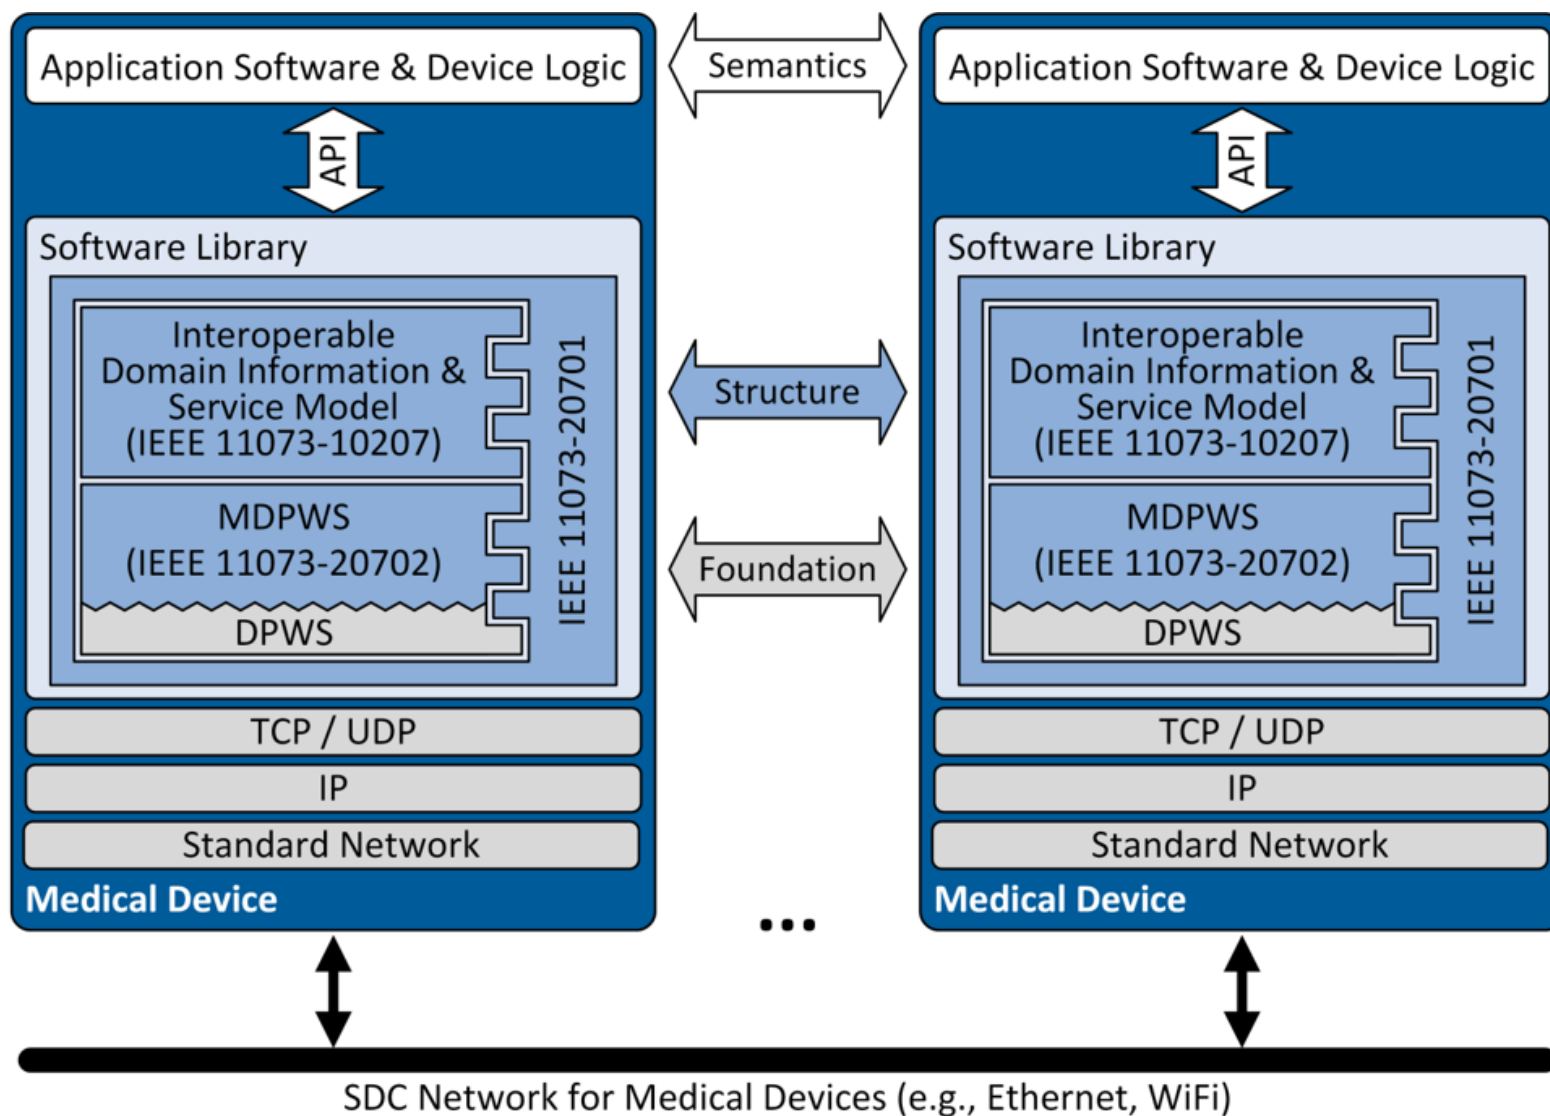

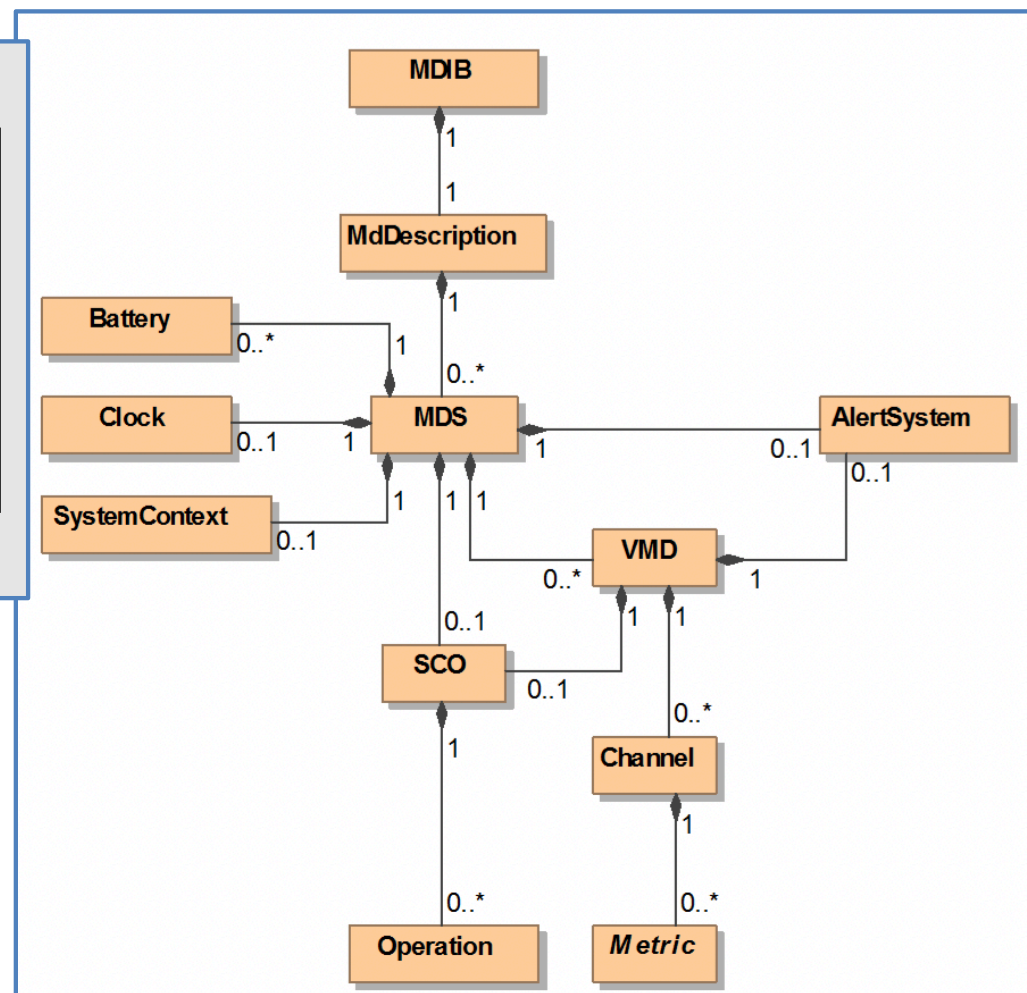

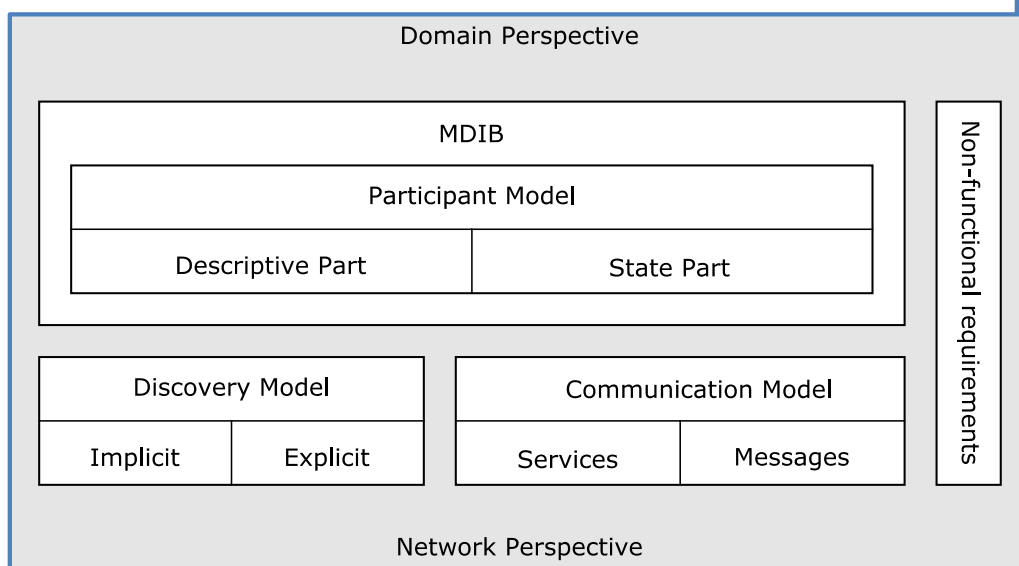

Figure D.1—Exemplary message sequence for discovering a service

(Source: 11073:20702)

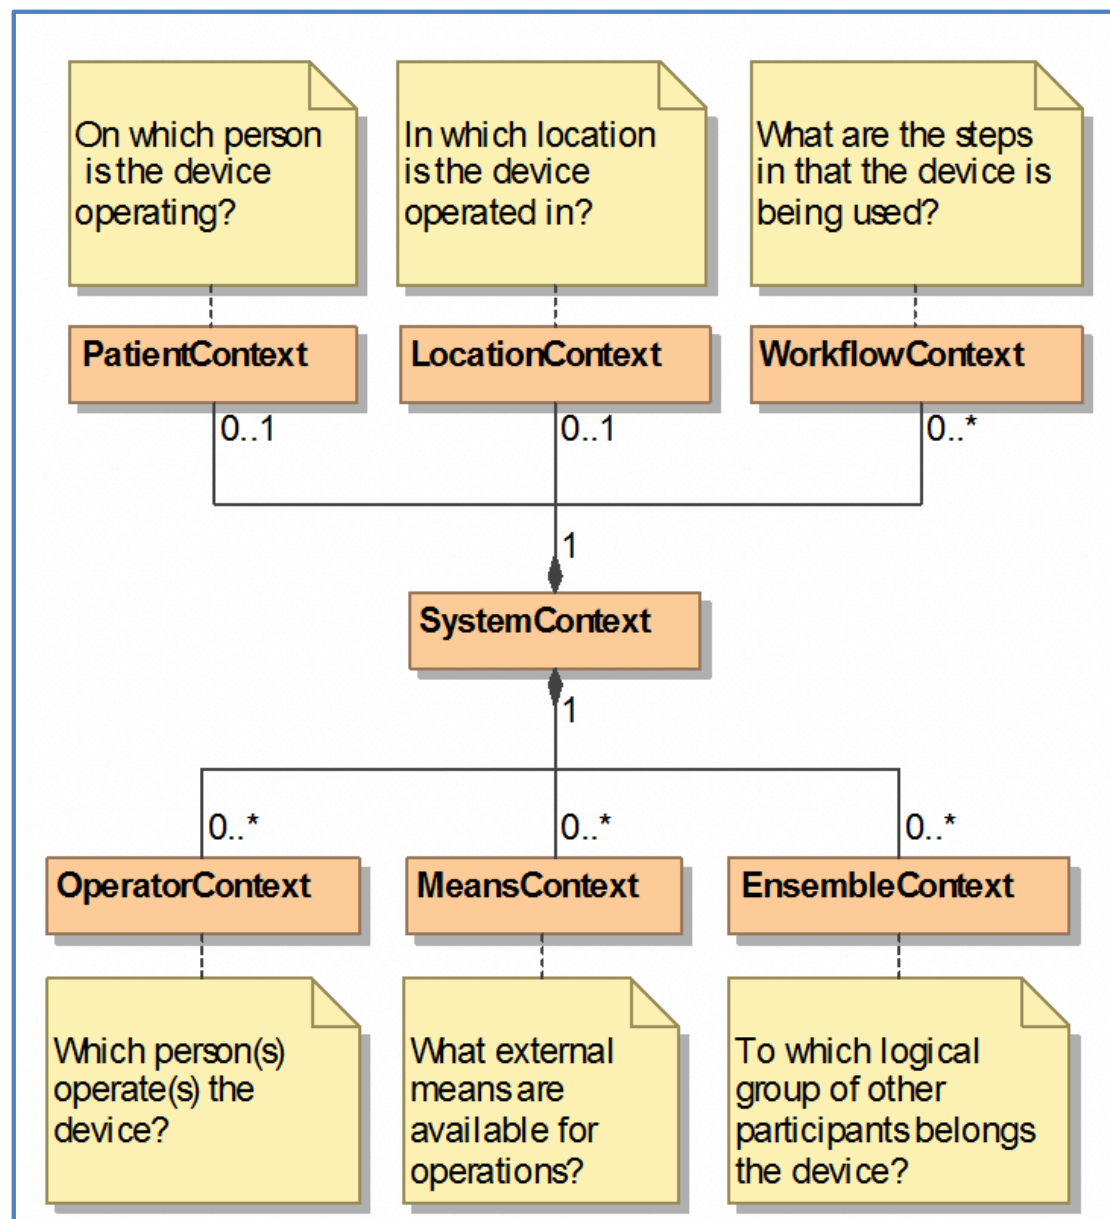

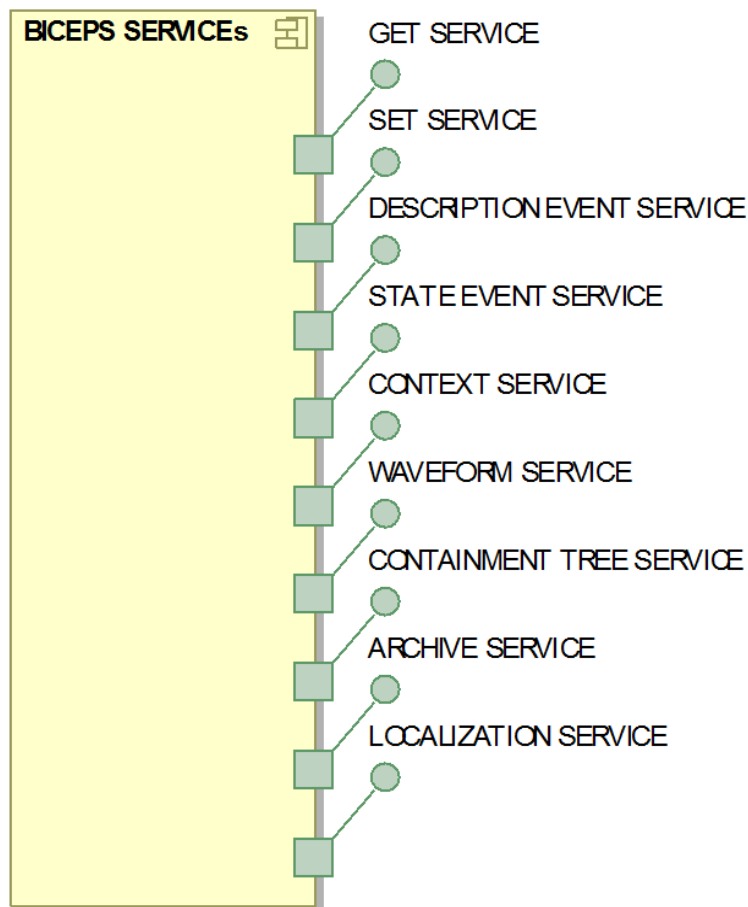

SDC Standards & Functional Capabilities

BICEPS Fundamentals:

Support for device clinical “system contexts” & Communication Services

Medical Device Profile for Web Services (MDPWS)

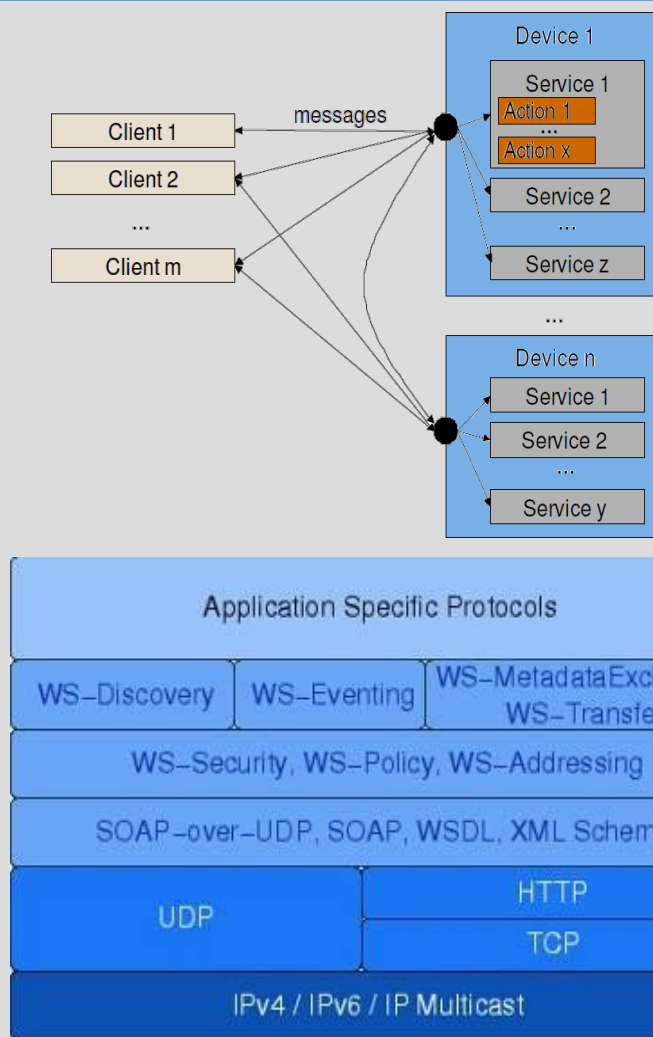

■ DPWS:2009* is the core of MDPWS

- OASIS standard (since 07/2009)
- Utilizes a subset of the WS-* standard
- Covers
 - Service discovery,
 - Interface description,
 - Messaging,
 - Event propagation, and
 - Secure information transmission
- Designed for resource-constrained devices

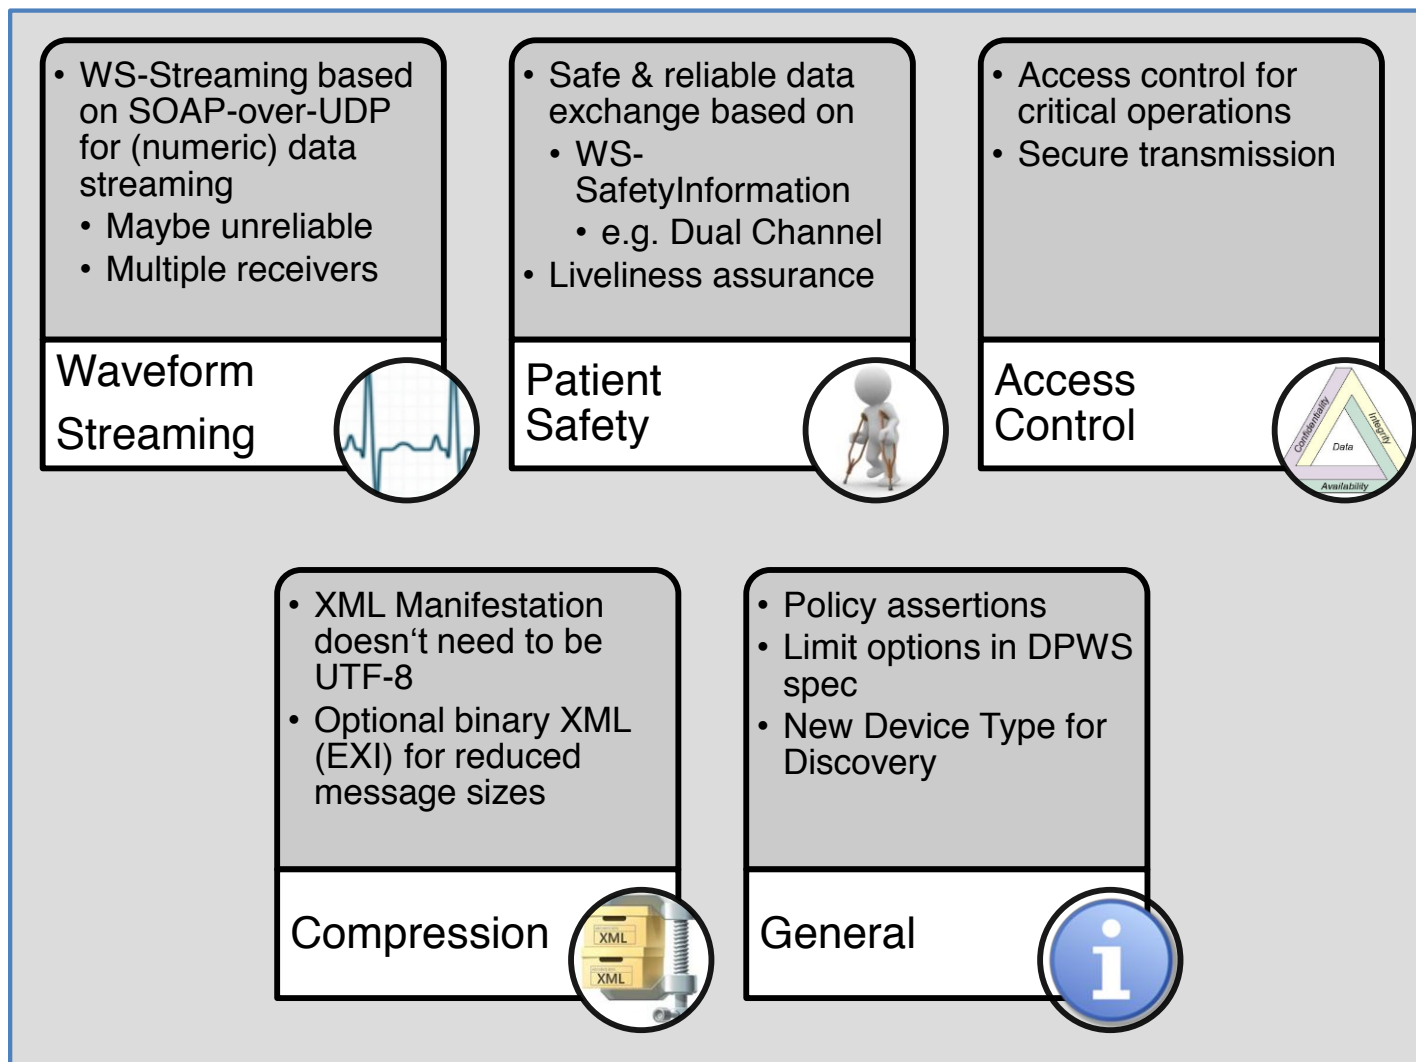

■ MDPWS

- Added some missing parts e.g. safe transmission of control requests

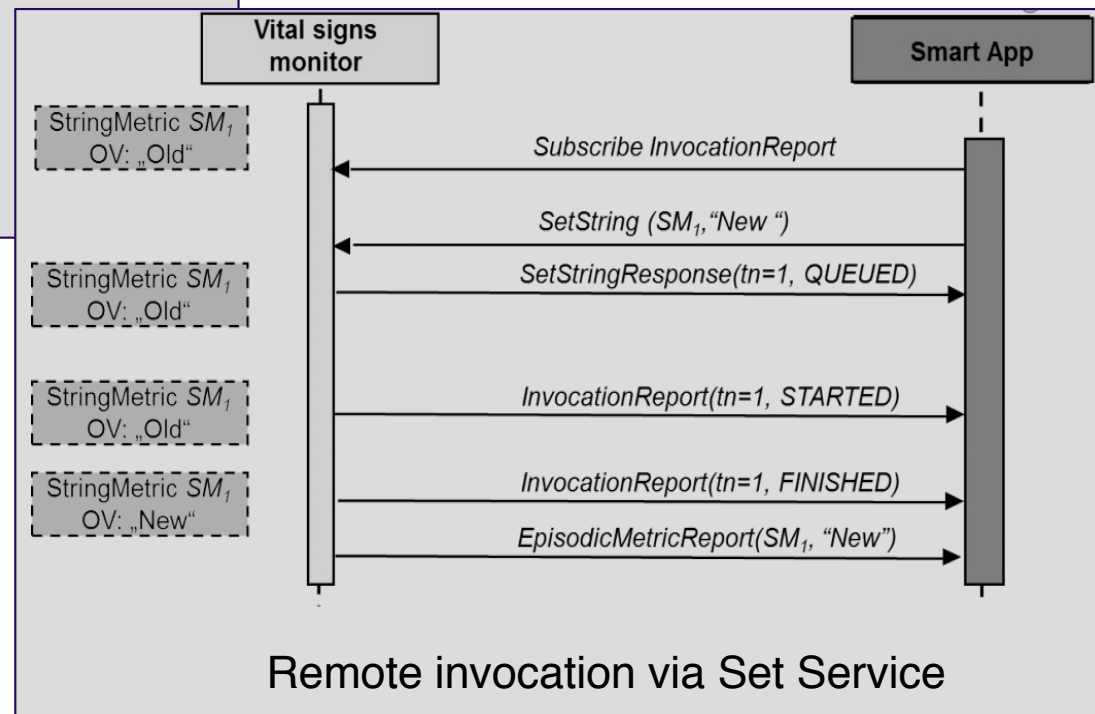

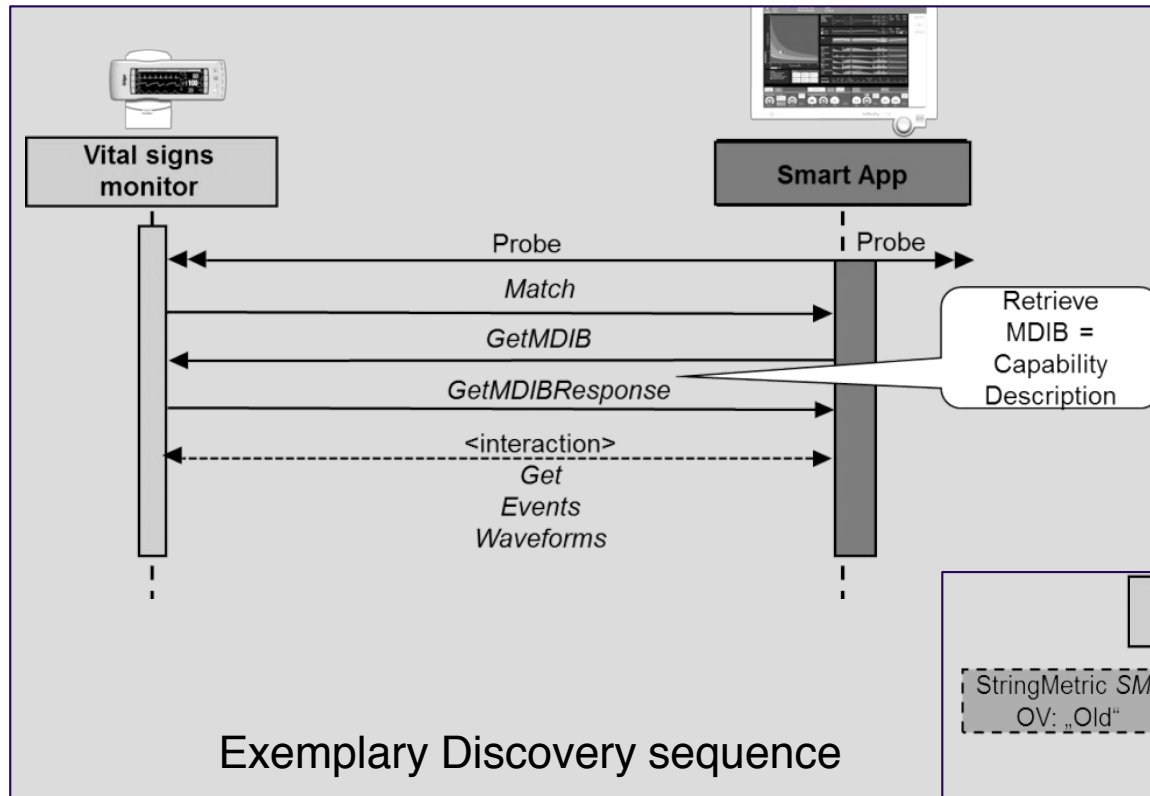

*See <https://www.oasis-open.org/committees/ws-dd/>

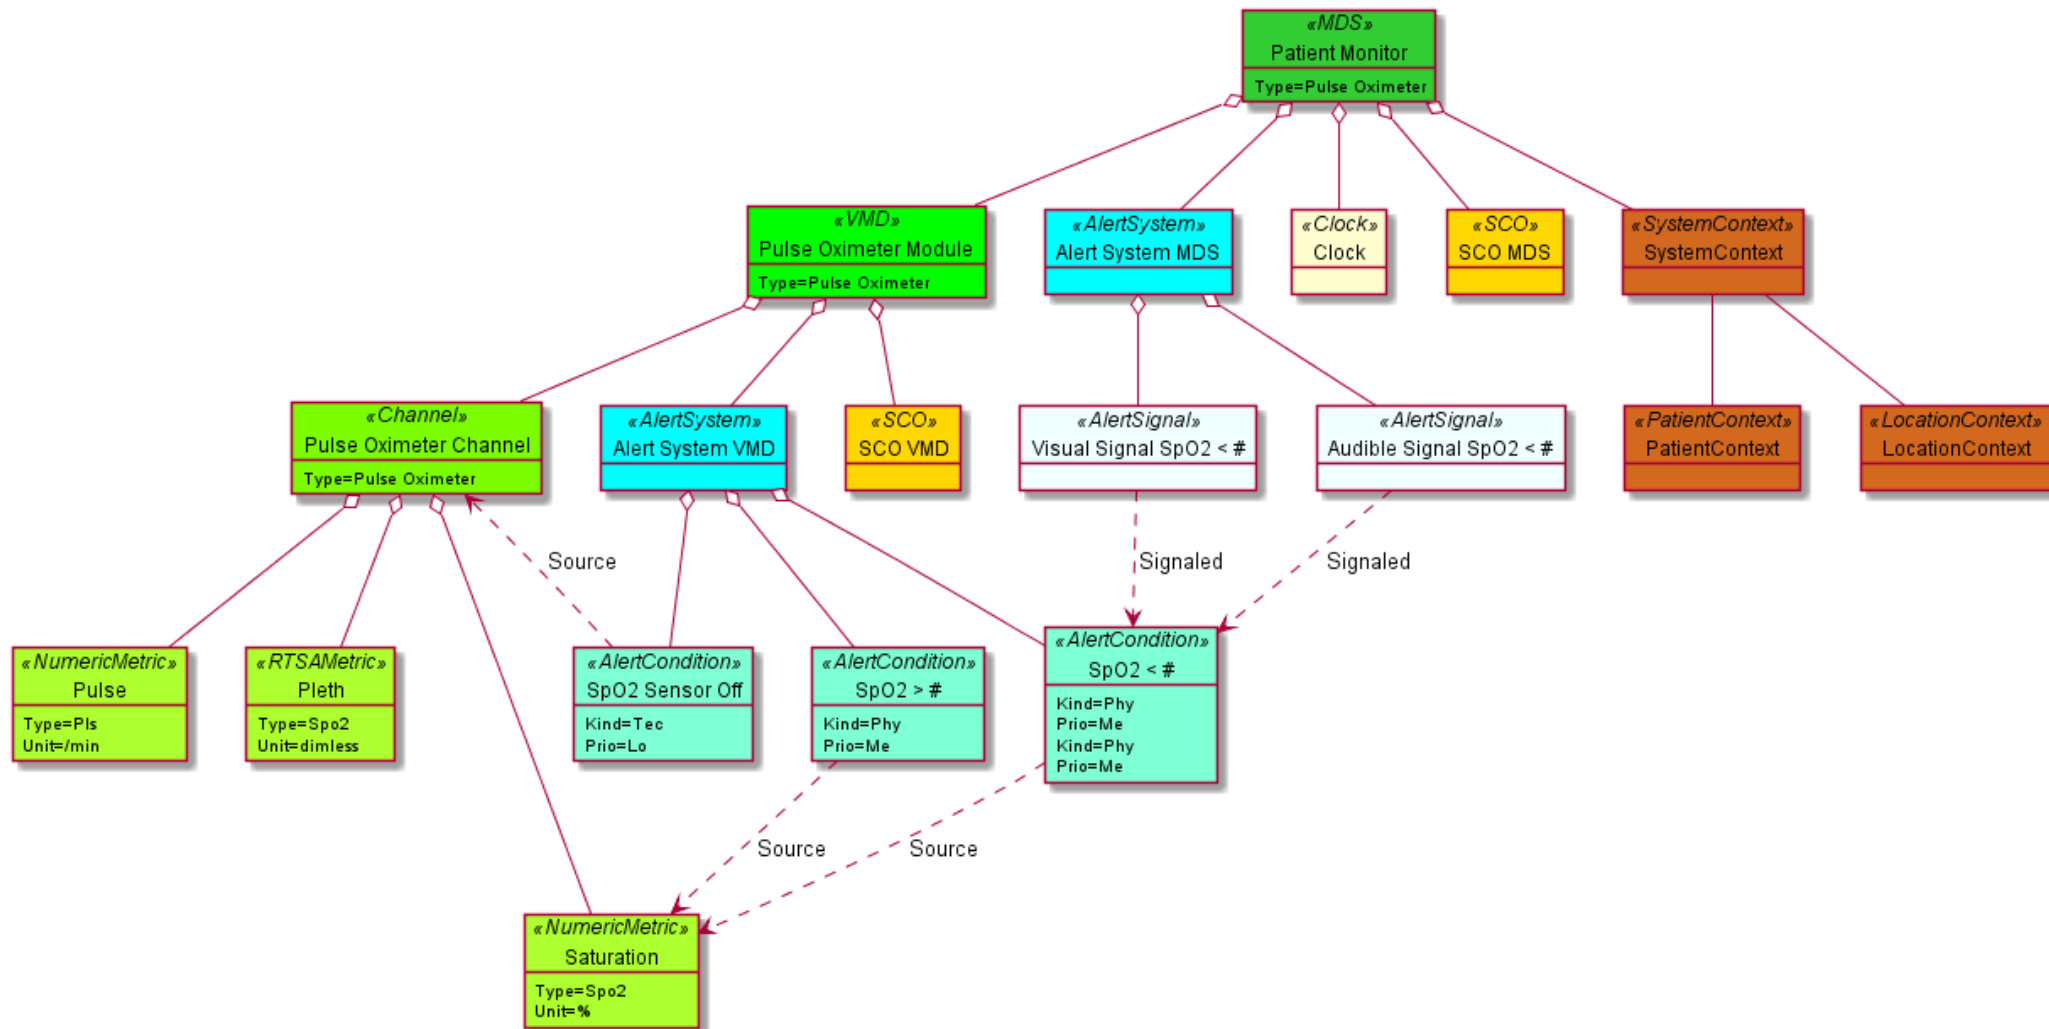

Medical Device Profile for Web Services (MDPWS)

Example SDC Scenarios

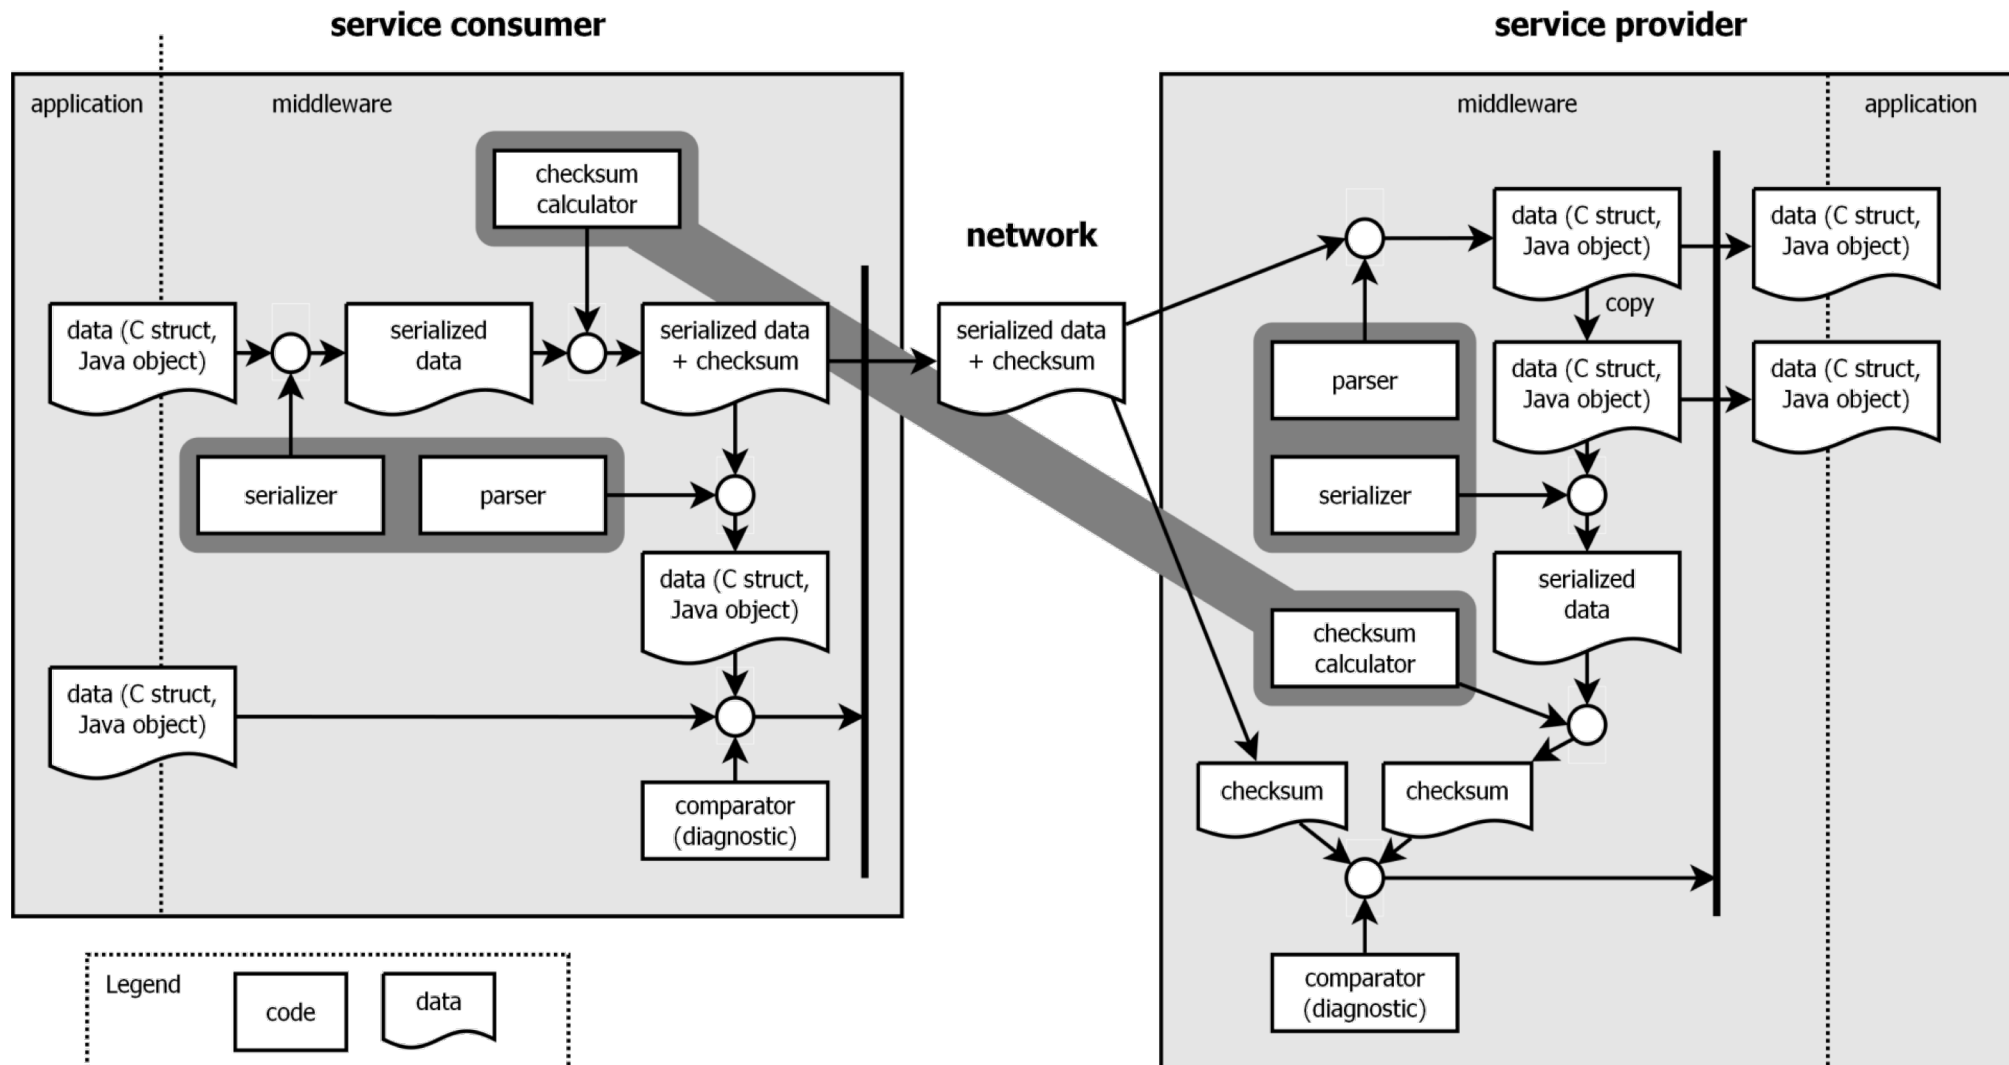

Example Participant Model: SpO2

Core differences between HL7 FHIR & IEEE SDC:

| | IEEE 11073 SDC | HL7 FHIR |
|-----------------------------------|--|--------------------------------------|
| Web service realisation | SOAP | (typically) RESTful |
| Communication topology | end-to-end | (typically) centralised repositories |
| Dynamic discovery | WS-Discovery | not intended |
| Synchronous communication | request-response | request-response |
| Asynchronous notifications | WS-Eventing | yes |
| Semantic annotations | coded values | coded values |
| Remote control | built-in | not intended |
| Safety mechanisms | Medical DPWS: SafetyContext, DualChannel | not applicable |
| Data compression | optional (EXI) | optional (gzip for RESTful) |
| Data streaming | Medical DPWS: Streaming | not intended |
| PHR management | not intended | built-in |
| Data traceability | optional (distributed) | built-in (repository-based) |

Dual Channel Transmission: Service provider detects a failure by means of an invalid checksum.

SDPi – Service-oriented Device Point-of-care Interoperability

- ✓ Overview / Background
- ✓ **SDPi White Paper – Update & Approval for Publication**
- ✓ Roadmap Review & 2019 / 2020 Planning
- ✓ DEV Technical Framework:
 - TF-1 Profiles (vol. organization)
 - TF-2 Transactions (#'s, labels, ...)
 - Grouped Actors: V2, PCD profiles, FHIR

- ✓ **Broad Public Comment Completed & Resolved by SDPi WG**
- ✓ **Roadmap Updated per Global Stakeholder Feedback**
- ✓ **Next: Publish to IHE.net**
- ✓ **Execute roadmap**

**IHE Patient Care Devices (PCD)
White Paper**

**Service-oriented Device Point-of-Care
Interoperability (SDPi)**

*Device-to-Device Connectivity in High-Acuity Healthcare
Environments using Web Services Technology*

Revision 1.0 – Draft for Public Comment

Date: August 1, 2019
Author: IHE PCD Technical Committee
Email: pcd@ihe.net

Four IHE Profiles Proposed:

SDPi Basic D2D PnP

SDPI-R Reporting

SDPI-A Alerting

SDPi-xC External Control

Each profile will include:

Options Security, Streaming

Grouped “Gateway” Actors

PCD Device-Enterprise Profile +
Devices on FHIR Integration

IHE Patient Care Device (PCD) Technical Framework

Volume 1 IHE PCD TF-1 Profiles

**Revision 8.0 – Final Text
October 23, 2018**

SDPi Proposed Roadmap:

3-Years starting 2019 October

SDPi(-x) “Basic” End of 2019

IHE PAT / CAT Events in 2020

Global engagement:
AU, EU, JP, KR, NA

First SDPi Certified Devices
@ End 2020!

Aggressive? Yes!
Aspirational? Yes Yes!

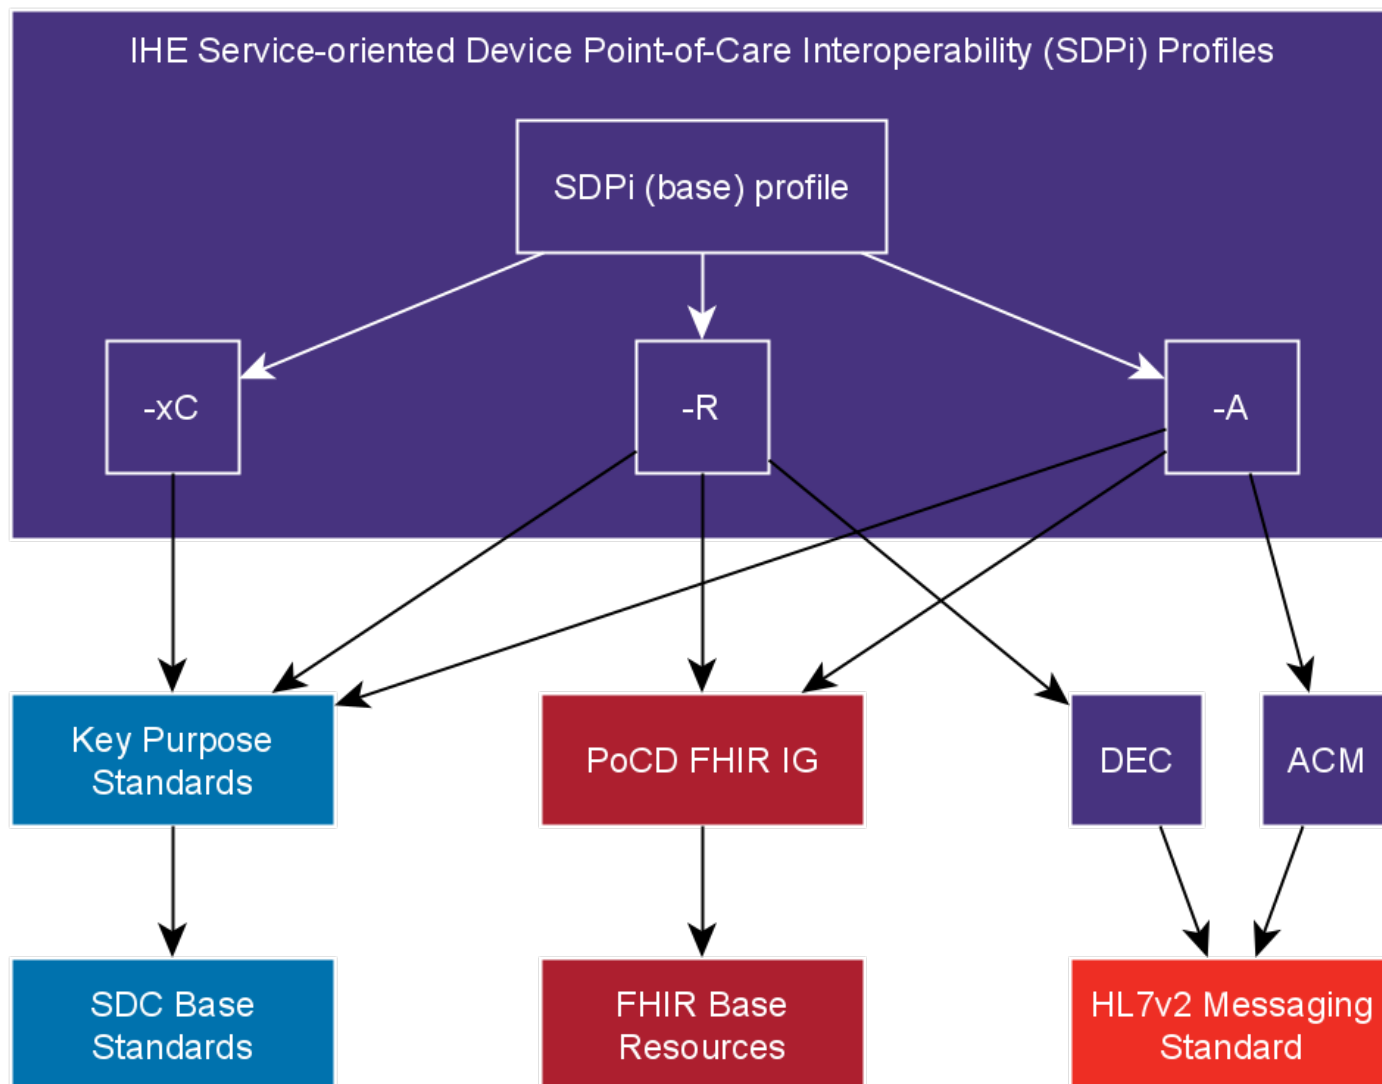

Achievable? Coalition of
the Willing

IHE Patient Care Device (PCD) Technical Framework

Volume 1 IHE PCD TF-1 Profiles

**Revision 8.0 – Final Text
October 23, 2018**

**A wealth of MDI use cases
have been developed over
the last few decades ...**

**SDC & IHE SDPi build upon
this rich heritage!**
