

<p>the use cases were being confused. The TC revised the language for clarification between manual and automatic orders. Also, there was confusion over the wording for charge posting and the TC approved this wording change: Order Filler will <u>automatically</u> send the <u>new</u> charges and add an A04 Outpatient registration message to A.3.2</p>		
<p>3. The TC discussed the PC recommendation for inclusion of the Importer Actor. There are really two issues; a modality importer, which is compatible with Acquisition Modality, and an import reconciliation of external data. The TC renamed this to Legacy Data Capture Actor. Don will work on adding this as a Supplement.</p>	Don	Status 1/30/09
<p>4. The TC discussed the PC recommendation for inclusion of Instructions for Performing a Procedure. This will be an option; otherwise it would make those companies adhering to Year 3 TF nonconformant. This appears to be described already by NTE under the OBR detail, which specifies that detail about the order is provided by the provider. This can be mirrored in Eye Care for a Year 4 supplement. Rick Butler will research this and come back to the group with a proposal.</p>	Rick	Status 1/30/09
<p>5. The TC discussed the PC recommendation for inclusion of Appointment Schedule Notification Transaction. This will likely involve the development of a new profile. Rick Butler will look at this in more detail and the different versions of the relevant HL7 messaging.</p>	Rick	Status 1/30/09
<p>6. The TC discussed the PC recommendation for inclusion of OP compression. Mike Schmidt wrote a proposal which the TC will discuss in more detail at its teleconference on 1/30/09. This proposal describes the enhancing of the specification of transfer syntaxes in the EYECARE profile to be more flexible.</p>	All	Discussion 1/30/09
<p>7. The TC discussed the PC recommendation for inclusion of Contrast/Bolas Time. The group decided that this should be included as part of the Final Year 3 Technical Framework. Mark Horton and Linda Wedemeyer will write this up, with input from Mike Neider.</p>	Mark Linda with input from Mike Neider	Status 1/30/09
<p>8. The TC discussed and approved a Supplement Template developed by Don.</p>	Don	1/30/09
<p>9. The TC discussed that there would need to be a review of the Final Year 3 Technical Framework against the Trial Implementation Version to see if substantive changes existed, and whether that would mean companies who had tested in the Year 3 Connectathon would need to test again in Year 4.</p>	All	Discussion 1/30/09
<p>10. The TC discussed the timeline for the Final Year 3 Technical Framework and set a deadline of March 31, 2009. Edits will be discussed at the 1/30/09 conference call.</p>	All	1/30/09
<p>11. The TC discussed the timeline for the Year 4 Supplements. Because of the need to recruit additional vendors and allow</p>		

them to implement Final Year 3 Technical Framework and the concurrent activities related to CCHIT certification for eye care EHRs, the group determined that there was not a pressing need to include all the proposed supplements for the 2009 Connectathon.		
12. The TC discussed rescheduling the TC teleconferences to make it more convenient for international participants. The teleconferences will now take place Fridays at 9:00 – 11:00 a.m. Pacific Time, one hour earlier.	All	Beginning 1/30/09
